

Contra Costa County

Contra Costa Transportation

Key Transportation 2030 Issues:

- Congestion management agencies and transportation authorities are facing major financial obstacles regarding:
 - Delivering operational improvements and capacity-enhancing projects promised to the public in the face of funding shortfalls
 - Adequately protecting and preserving the existing transportation system
 - Implementing projects that support desired development patterns and promote economic vitality, address critical local needs and preserve environmental quality
 - Maximizing our flexibility to direct both our state Regional Transportation Improvement Program funds and a reasonable share of federal Surface Transportation Program/Congestion Mitigation and Air Quality Improvement funds to Contra Costa County's most pressing needs.
- In this context, selected critical investments for Contra Costa County that need to be addressed in the Transportation 2030 Plan include:
 - Route 4 East widening to eight lanes from Loveridge to Route 160
 - e-BART extension of rail service in East Contra Costa County
 - The fourth bore of the Caldecott Tunnel
 - High-occupancy vehicle (HOV) lanes, interchange, access and transit/HOV parking improvements to I-80 and I-680
 - An estimated \$800 million shortfall in local streets and roads rehabilitation funds during the Transportation 2030 period
 - Determining our potential responsibility for addressing BART's capital needs (with MTC, BART and Alameda, San Francisco and San Mateo counties)
 - Potential expansion of express bus service throughout the county and into Alameda County
 - Further upgrades to Capitol Corridor rail service and stations.
